This is a game console emulator created by "a-kobo" (Andrey Kokhov) and Lucas MeliÃis. It emulates games for Sony PlayStation, but it is also possible to run games made for the original PlayStation. In the Nintendo 64 version, the RetroNX / RetroArch plugins are included. This is the PSX version of the emulator, but as mentioned previously, it has a lot more than games. In addition to this, it now also supports disk emulation for PlayStation discs, such 0cc13bf012

Well, we didn't actually make it to the desert until the end of July, but we did finish up our first five months, and it was a grand time for all of us! This is a tough time to chronicle it because it

will all be a blur in the rear-view mirror, but I have a few things of interest.
