A storyline that inspires players to discover their own challenges and promote their own individuality. 8. A game that encourages players to make worthwhile contributions with their own unique play styles to create new individuals through the recognition of the “Legend of Tarnished Soul”. 9. A game where the theme has moved from a pastel and nostalgic world to a fantastic fantasy world with expansive dreams. Just as the game has this same look, it will also come with the same sense of adventure and excitement.
